

THE SPECTRUM

Gender can be a very complicated thing, and a lot of people agree that rather than it being just male and female, gender is actually a spectrum. Can you use lots of different colours to colour in the spectrum?

Some people don't identify with being male or female - they are *non-binary* and may want to be referred to as *they*, rather than he or she. In the next story you will meet Kai, who uses *they/them* pronouns.
